FOREWORD

The first federal population census for Greene County, Illinois, was enumerated by Richard Ratton in 1830. The original 1830 census schedule was designed to reflect the following information:

Total number of persons in household

The transcription which follows was prepared using a microfilm copy of the original, National Archives Microfilm Publication M19, Roll 24. The first column lists the original census page and line number for each household. Zeros have been used to indicate age categories for which no persons were enumerated, up to the last numbered category. Of interest are the individual totals for the various age groups, listed in parentheses above. It appears that the male settlers were for the most part, a young group.

All names have been transcribed exactly as they seem to appear on the microfilm copy of the original enumeration. Since names were often misspelled by the enumerator, the researcher should consider every possible spelling when searching for a particular name.

This census was transcribed by George B. King; Mrs. George B. (Thelma) King assisted with proof reading; Mrs. Roman J. (Phyllis J.) Bauer indexed and typed the material.
